

## **PUBLIC NOTICE**

### **Village of Strathclair:**

**It has been suggested that homeowners should turn the tap next to your water meter on and off a few times each year to ensure they work properly. Possibly each time you read your water meter it could be done. This may prevent problems in the event you need to turn the water off to repair some household plumbing. If it is not working smoothly you would then know if you require the services of a plumber to change the tap.**

**R.M. OF STRATHCLAIR**
